SUMMARY

Computer Science undergraduate specializing in Java development and React-based frontend engineering. Proficient in building responsive web applications, designing RESTful APIs, and developing scalable software solutions. Demonstrated problem-solving skills through efficient data structures, algorithms, object-oriented programming, and modular application design.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python
- **Frontend:** React.js
- **Backend:** Node.js, Express.js, SpringBoot(Basics)
- **Databases:** MySQL, MongoDB
- **Tools:** Git, GitHub, Postman

EXPERIENCE AND PROJECTS

- **AI-Enabled Audit Management System — Tech Stack: MERN, VLM, Leaflet** Aug 2026
  - Developed an AI-enabled infrastructure audit platform integrating QR authentication, live GPS verification, and image capture to improve inspection authenticity and evidence traceability.
  - Implemented VLM-based visual analysis, dynamic inspection questions, and multi-layer validation to support compliance assessment, automated audit reporting, and centralized monitoring.

  Live Link - https://audit-management-system-xi.vercel.app/

- **Dropout Prediction System — Tech Stack: MERN, Vercel, Render** Feb 2026
  - Architected and deployed a scalable ML-driven web application using REST APIs to predict student dropout risk, enabling data-driven decision making and early intervention.
  - Optimized system performance through efficient data preprocessing, feature engineering, and model tuning, improving prediction reliability, backend efficiency, and response time.

  Live Link - https://dropout-prediction-phi.vercel.app/

- **KnowMyCampus — Tech Stack: MERN, Vercel, Render** July 2025
  - Designed and architected a scalable full-stack platform with secure role-based authentication and RESTful services, ensuring efficient data flow and modular system design.
  - Enhanced application performance and usability by implementing placement eligibility algorithms and real-time discussion modules, improving user engagement and system scalability.

  Live Link - https://knowmycampus.vercel.app/

ACHIEVEMENTS AND CERTIFICATIONS

- Won Thematic Award at IDEATHON 2025 organized by Florida International University, USA
- Solved 400+ problems on LeetCode with a rating of 1534, demonstrating strong proficiency in Data Structures, Algorithms, and problem-solving
- The Joy of Computing using Python (NPTEL - Silver Medal, 87%) - *Applied OOP concepts, algorithmic thinking, and problem-solving techniques to build efficient and modular Python programs*
- React.js Certification (2025) - *Built dynamic UI components using state (useState) and props, focusing on reusable architecture, performance optimization, and responsive design*

EDUCATION

- **Bannari Amman Institute of Technology** 2023 – 2027
  B.Tech Computer Science and Business Systems CGPA: 8.3
- **A.P.C. Veerabahu Matric Hr Sec School** 2020 – 2023
  HSC Percentage: 91.17
  SSLC Status: PASS
